The Hawai'i Department of Transportation wants your input. The Hawai'i Statewide Transportation Plan (HSTP) is a broad-based policy plan document that will give common direction to planners of Airports, Harbors, and Highways. This includes planners of bicycle, pedestrian, and transit facilities. Come and learn more about transportation and our aging population, global climate change and its effect on our transportation facilities, and fuel and energy for transportation. Learn about the Goals and Objectives for the HSTP, and give your feedback.
